

ICF Staff Hub — New Preview Workflow

For the Staff Hub team · July 24, 2026

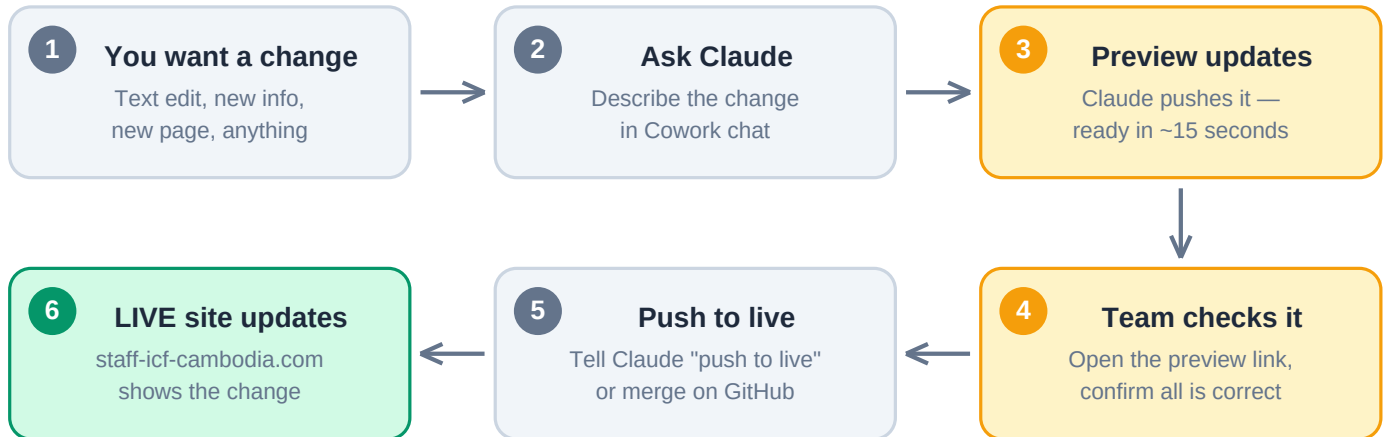

What changed

The Staff Hub now has a PREVIEW (test) site. Every change appears there first, so the whole team can check it before it touches the real site. Live only updates when the team confirms it's ready.

Preview site: <https://preview--candid-moxie-b648e8.netlify.app>

Sign in with your normal ICF Google account. Live site: staff-icf-cambodia.com

How we work now

Not happy at step 4? Ask Claude to fix or undo it — live is never touched until someone does step 5 on purpose.

GitHub Desktop — important rules

STOP before you click Commit!

If GitHub Desktop shows changed files that YOU did not make — do not commit them. Ask Claude first. A wrong commit can silently undo another person's work. (It almost happened already — Claude caught it.)

When in doubt, ask Claude: "I see changes in GitHub Desktop — what are they?"

1. You normally don't need GitHub Desktop at all — just ask Claude to make changes.
2. If you do use it: the Current branch must ALWAYS say "preview". Never switch to "main".
3. "main" = the LIVE site. Anyone can push to live AFTER the team checked the preview — tell Claude "push to live", or click "Compare & pull request" on GitHub and merge it there.
4. Click "Fetch origin" before starting, so you have the latest version.
